

Macro (a closer look at the past week)

Monday's light-painting workshop was postponed because of the snow/ice weather conditions and is to be re-arranged for upcoming available slots in Feb. Fortunately Zoom makes some activities easier in the "dark months". On Wednesday Phil Savoie - an award-winning natural history BBC cameraman - think Sir David Attenborough - gave us his very entertaining and informative "(everything but the) kitchen sink" talk "Principles of Photography". He covered macro, astro, sport, chest cams, fishing buckets, depth of field, diffraction, snoots, shutter speed, lucky 7, bokeh, George's tree, etc. You can [download here some of his material](#) (provided by Phil). Check out his website at philsavoie.com. We will be looking at booking a follow-up talk later in the year.

We welcome Keith Ford who joined this week and is an Olympus (OM Systems) photographer.

Wide-angle (the bigger picture) - website updated with [full programme](#) (click link)

Phil Savoie referenced some useful online materials. OpticalLimits.Com provides resolution info on a wide variety of lenses to identify f stop for the sharpness sweet spot. His suggestion is to tape the data to your lens cap for quick reference. PhotoPills.Com provides lots of information on depth of field distances (as well as a smartphone app with the info to hand). The site also has some useful [free ebooks](#) on DOF etc.

Mid to Long Range Zoom (a look at what's coming up in the next few weeks)

(i) = organised by interest/learning group - watch out for email details from organiser(s)

- Mon 15 Jan 6pm - deadline for receipt of DI Comp Round 1 images (see separate email)
