

Macro (a closer look at the past week)

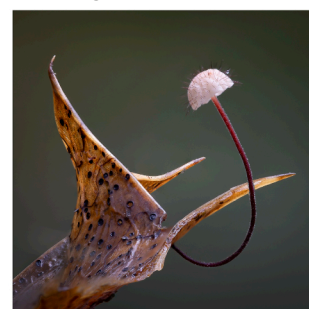

Edition 100 - and a look back at some images from the first edition in late Feb 2022 with the first (tele)Photo Challenge winners (which involves CCC and clubs from Belfast, Cardiff and Edinburgh).

1 Fire, Smoke, Toxins and Waste by Colin Paul of CPA (27/30)

2 West Wittering Sands by Steve Yates of CCC (26/30)

3 Holly Leaf Parachute Fungus by Vittorio Silvestri of CPA (25/30)

With the increasing number of catch-ups at Hut meetings in the new core programme the pdf newsletter now moves to two editions per month - centred around talk info and results - and with the usual other bits of news. In between the pdfs there will be a short email newsletter of important reminders etc.

Welcome to new member Kev Neylon who met up with some of us at the Exhibition Open Evening. From Kev "I don't have much of a photography background. I do take a lot of photographs whenever I go somewhere, but they tend to be very much quantity over quality, and I tend to use them to illustrate my writing / blog posts. I would like to become more quality focused, and learn more about photography as a whole."

Thanks to Steve Y for the recent printing/mounting workshops. A reminder that you can print at home or have imaged printed by online services or on the High Street. For internal use prints just need to stand upright but if use regularly or wider than a standard 400mmx500mm card mount is used (any colour but think about visual presentation) - image can be (spray) glued on top or behind a standard or bespoke cut window. AS PRINTS ARE OFTEN STACKED THEN IT IS IMPORTANT THAT THERE IS NO RAISED EDGES OR TAPE as this can damage other prints. DO NOT USE SELLOTAPE, PLASTIC PARCEL TAPE, GORILLA/DUCK/CARPET TAPE (!) which can leave sticky edges. A CARD BACKING is useful to protect the print and keep it flat in the mount.

Wide-angle (the bigger picture) - website updated with [full programme](#) (click link)

Sensor Spot - an occasional item on some "technical" aspect of photography - for those that may be interested.

If you are interested in understanding a bit more about [sensor sizes and effects on photography](#) and [sensor size and low light photography](#) then check out [Thomas Eis](#) on YouTube. He is an OM Systems (Olympus) advocate - but don't let that put you off - his comparisons are informative and entertaining. Other YouTube channels are available - share your favourites.

Mid to Long Range Zoom (a look at what's coming up in the next few weeks)

(i) = organised by interest/learning group - watch out for email details from organiser(s)

Hut available on unused Wednesdays for workshops

- throughout Aug/Sept - Annual Print Exhibition at Crawley Museum (Thurs/Fri/Sat 10.30-16.00)
- Mon 26 Aug 6pm - deadline for receipt of Monthly Comp images "the letter E" followed by online poll
